Landia EradiGator handles the problematic trash found in prison wastewater systems.

Wes Cullin, Facilities Maintenance Superintendent at Crittenden County Detention Center, said:

»We have not had one single problem with the Landia Pumps. They have been operating great!«

Landia's Heavy-Duty Chopper Pumps are Recommended for a Wide Range of Applications

Thousands of Landia chopper pumps are in operation worldwide, pumping various types of severe mediums where traditional pumps have experienced continuous problems, such as clogging, pump failure, etc.

- Domestic wastewater containing food, paper, rags, fat, etc.
- Abattoir wastewater containing bones, intestines, feathers, hair, fat, etc.
- Waste oil from industrial manufacturing facilities, repair shops, etc.
- Fish and fish by-products
- Paper pulp and paper waste
- Sludge, organic waste, slurry and straw at biogas plants
- Cooling water containing hard solids

- Don't forget to feed the Gator!
